

Aleksandr Suprun

Senior DevOps

📍 Tbilisi, Georgia | 📧 a.suprun1312@gmail.com | 🌐 <https://sasha-sup.github.io/>

Summary

Tech stack: AWS, Linux, Python, Bash, GitLab CI/CD, Jenkins, PostgreSQL, nginx, Ansible, Terraform, Kubernetes

I'm a highly motivated IT professional with a strong passion for technology, which has fueled my successful career. Committed to continuous learning, I actively seek opportunities to improve my skills by reading specialized literature and participating in IT communities. This helps me share my expertise and gain insights from industry peers. ☀️

My interests include application security, artificial intelligence, and Telegram bot development. I hold certifications in AWS and HashiCorp, and I'm currently working towards Kubernetes certification to deepen my cloud orchestration skills. I also have a strong interest in Infrastructure as Code and observability. 📖 🧠 🐛

I use arch with i3wm, btw 🖥️

Experience

Sweatcoin DevOps Engineer 🌐 https://sweatco.in - Developed and implemented a monitoring system for critical systems in Consul. Exported check results to Alertmanager with notifications in Slack. Constructed a dashboard in Grafana. - Introduced a Grafana provisioning system using config files. - Enhanced existing and introduced new Ansible roles. - Architected and implemented a Jenkins pipeline for test automation, deploying infrastructure in AWS through a combination of AWS CLI and Terraform. - Crafted Bash scripts to automate various tasks.	July 2023 — October 2023 London, Great Britain	Appello Software DevOps Engineer 🌐 https://appello.com.au/ - Reduced the company's AWS costs by 15%. - Built a monitoring system utilizing Grafana, Prometheus, and CloudWatch. - Optimized CI/CD processes, resulting in a 40% reduction in median build time. - Created Terraform modules for deploying environments. - Developed Ansible roles, Bash, and Python scripts for various automation tasks. - Conducted training seminars for colleagues from other departments. - Held the position of DevOps team lead. - Worked with AWS: EC2, ECS, EKS, RDS, ECR, Route53, IAM, Cloudfront, CloudWatch, CloudTrail, S3	September 2021 — July 2023 Sydney, Australia
RT Labs DevOps Engineer 🌐 https://rtlabs.ru/ - Prepared the pre-production environment in a private cloud. - Developed Ansible roles for automating management and updates of software products. - Worked with a private cloud on VMware, including development and staging environments. - Engaged in optimizing the Nginx proxy. - Created GitLab CI pipelines. - Automated various tasks by writing scripts in Bash and Python. - Documented the software product update process. - Interacted with related departments and contractors.	March 2020 — August 2021 Moscow, Russia	Chestny Znak Linux Engineer 🌐 https://chestnyznak.ru/en/ - Worked as part of the on-call shift as a Linux engineer. - Managed the company's infrastructure, consisting of 1200+ servers across three data centers. - Developed pipelines in GitLab. - Wrote Ansible roles. - Automated the process of updating data in FreeIPA using Python. - Monitored infrastructure metrics and responded to alerts. - Conducted troubleshooting of incidents. - Participated in the update of the company's network equipment.	November 2018 — February 2020 Moscow, Russia

Education

42 🌐 http://www.42.fr/ Learned C programming, basic Linux admin skills through extensive training. Explored programming concepts, hands-on coding, debugging. Understand Linux OS - installation, configuration, administration.	Nov 2018 - Nov 2019	Juneway.pro 🌐 https://juneway.pro Graduated DevOps course, hands-on deploying Django app (Docker, Postgres, nginx) in Gitlab-CI, strong container deployment & app management grasp. Deployed GCP infra with Ansible/Terraform. Also, set up KubeSpray Kubernetes cluster.	Dec 2019 - Nov 2020
